

The Neuroscience of Leadership

A One-Day Online Seminar for Federal Leaders, Supervisors, Managers, Employees, and Union Officials

May 19, 2022 9:00am – 3pm – Central Standard Time

Location: Online Course using Zoom Platform

Open-Enrollment Cost: \$99.00 per person

Contact: pitthal@aol.com or Hal Pitt at 719-313-2540 MST

Upon leaving this seminar, you will:

- Have a deeper understand why people act the way they act
- Learn how to stimulate oxytocin to build trust and social bonding
- Acquire skills to influence others towards greater levels of commitment
- Know how to energize others towards a shared vision and values-based culture
- Learn how to motivate and energize others through dopamine stimulation
- Know how to access the prefrontal cortex to deal with one's and other's emotions
- Learn to create principle-centered constructs to develop character and integrity
- Recognize how one's beliefs and biases may be harmful and how to change them
- How to facilitate change in whiney, blamey drama kings and drama queens
- How cortisol is killing the workforce and strategies to change it

*"This is by far the most powerful leadership course I have ever attended. Everyone needs to take this course. It has changed my life and I know it will change other people's lives too."
- attendee at VA Administration in Denver, CO*

Topics Covered

- The differences between management and leadership
- Why leadership is a group process
- The necessity of creating a shared vision
- The neuroscience of human behavior
- Why facilitating change in others is so difficult
- Creating positive experiences and memories to facilitate change in ourselves and others
- Understanding the functions of the hippocampus, amygdale and prefrontal cortex
- Leading others through oxytocin, serotonin and dopamine stimulation
- Powerful strategies to change behavior that will lead to attitude changes
- 5 best practices of exceptional leaders
- Being a leader of integrity and character
- Why organizational values are an absolute necessity to creating a healthy culture

Comments from past participants

“Why didn’t I learn this stuff years ago? It would have changed the way I lead and changed the way I raised my children. Transformational information from Hal Pitt.”

- attendee at City of Everett, WA

“Hal, I want you to know that I have been practicing some of the stress management techniques you shared in the course. I am sleeping better than I ever have and am sharing this information with others.” – attendee at Architect of the Capitol, Washington D.C.

“I can’t believe that it worked! I shared the character anchor information from your Neuroscience of Leadership course with my team and now we are all practicing your strategies. It has truly changed my team for the better.” – attendee, at VA in Lebanon, PA

“Hal. I reflect on my character anchor every day. It has helped me weather the storms of politics in D.C. and helped me focus every day on my integrity and character.”

- high level official in Washington D.C.

“Your course has made me realize I need to change some biases I have that are harming me and my family. I am going to call my father tonight and tell him how much I love him. Thanks so much for our workshop.” – attendee at National Parks Service workshop

“WOW! AWESOME! FANTASTIC! BRILLIANT! Hal, those are just some of the words that describe your workshop.” – manager at Naval Shipyard, Bremerton, WA

“I really enjoyed the way you integrate multimedia into your presentation. Really kept me interested. I didn’t want to fall asleep one time and that is rare for me in courses.”

- Attendee in New Orleans, Louisiana

“Hal, since your course, my team has implemented a new mission, vision and core values. We are going to have a kickoff barbecue next month. Thanks for the helpful information you shared in the seminar. Hope to see you again in the future.” – senior leader at a city in Wyoming

“I wish I could take you with me and you could present this information to our senior leadership. I believe it would revolutionize our culture.” – attendee in Denver, CO

“Why aren’t more senior leaders taking this course? They send the managers but think they don’t need to learn anymore. I can’t think of the last time our leaders have attended any of our leadership courses.” – manager at Department of Transportation
